

MASS TORT & TOXIC EXPOSURE LITIGATION

SHUMAN
McCUSKEY
SLICER PLLC

ATTORNEYS AT LAW

OVERVIEW

Our mass tort and toxic exposure law team routinely defends clients facing legal disputes, including allegations of asbestos, silica, radon, and carbon monoxide exposure. In recent years, plaintiffs' attorneys have posed unique methods to bring these lawsuits to jurisdictions in large quantities and at a rapid pace. Therefore, you must rely on defense attorneys who will advocate on your behalf and provide sophisticated and unique methods to protect you. The Shuman McCuskey Slicer PLLC attorneys are among a premier class of legal professionals who are highly experienced in toxic tort and toxic exposure legal matters.

We always strive to make a lawsuit as worrisome as possible for our clients. However, today fewer cases are going to court, meaning many law firms have little to no proven court experience. We are proud of our firm's extensive trial experience regarding complex class action and mass tort cases in state, federal, and appellate courts. Our firm has nurse paralegals on staff and several on-site medical consultants who help our attorneys analyze the complex medical issues associated with these claims.

We work closely with our clients and their insurers to develop an effective litigation defense strategy designed to produce a satisfactory result based on each case's unique facts and the clients' desired goals.
